

## Save up to 25-40% on processing fees from commercial, federal, state, and local credit card payments!

Your company has gone to great lengths to make sure that it gets the most out of doing business with other companies or with the government. It's time to make sure you've taken the same care when it comes to being paid by credit card. Here is what you need to know:

- Special incentive rates have been created by Visa and MasterCard for commercial and government purchasing cards.
- To receive them, you need to be specifically set up to process Level 2 and Level 3 data with each transaction.
- In so doing, you can save as much as 25- 40% versus your current monthly credit card processing fees.
- In addition, this technology will insure compliance with Payment Card Industry (PCI) standards, protecting your company from fines and security breaches, which could devastate your business.

FTS is a full service provider of electronic transaction processing services. They offer a comprehensive line of solutions for credit and debit cards including Level 2 transactions for Business to Business payments and Level 3 transactions for all Purchase Cards including GSA SmartPay cards.

To take advantage of these reduced processing rates and PCI compliance requires a provider who is specialized in this area. You may have gone to your local bank to get your merchant account set up. Usually, because they don't have the specialized knowledge to handle your requirements, they will have set you up just like any ordinary business. This can be expensive and even risky for you.

Instead, with no more complication than it takes to purchase a book online, your business can move into the 21<sup>st</sup> century of processing by using Level 3 virtual terminal technology to reduce costs and improve security. What you need is a relationship with a processor who specializes in working with businesses like yours.
