IntelliCubes, Inc. 2009

## IntelliCubes Makes BI Successful and Cost Effective

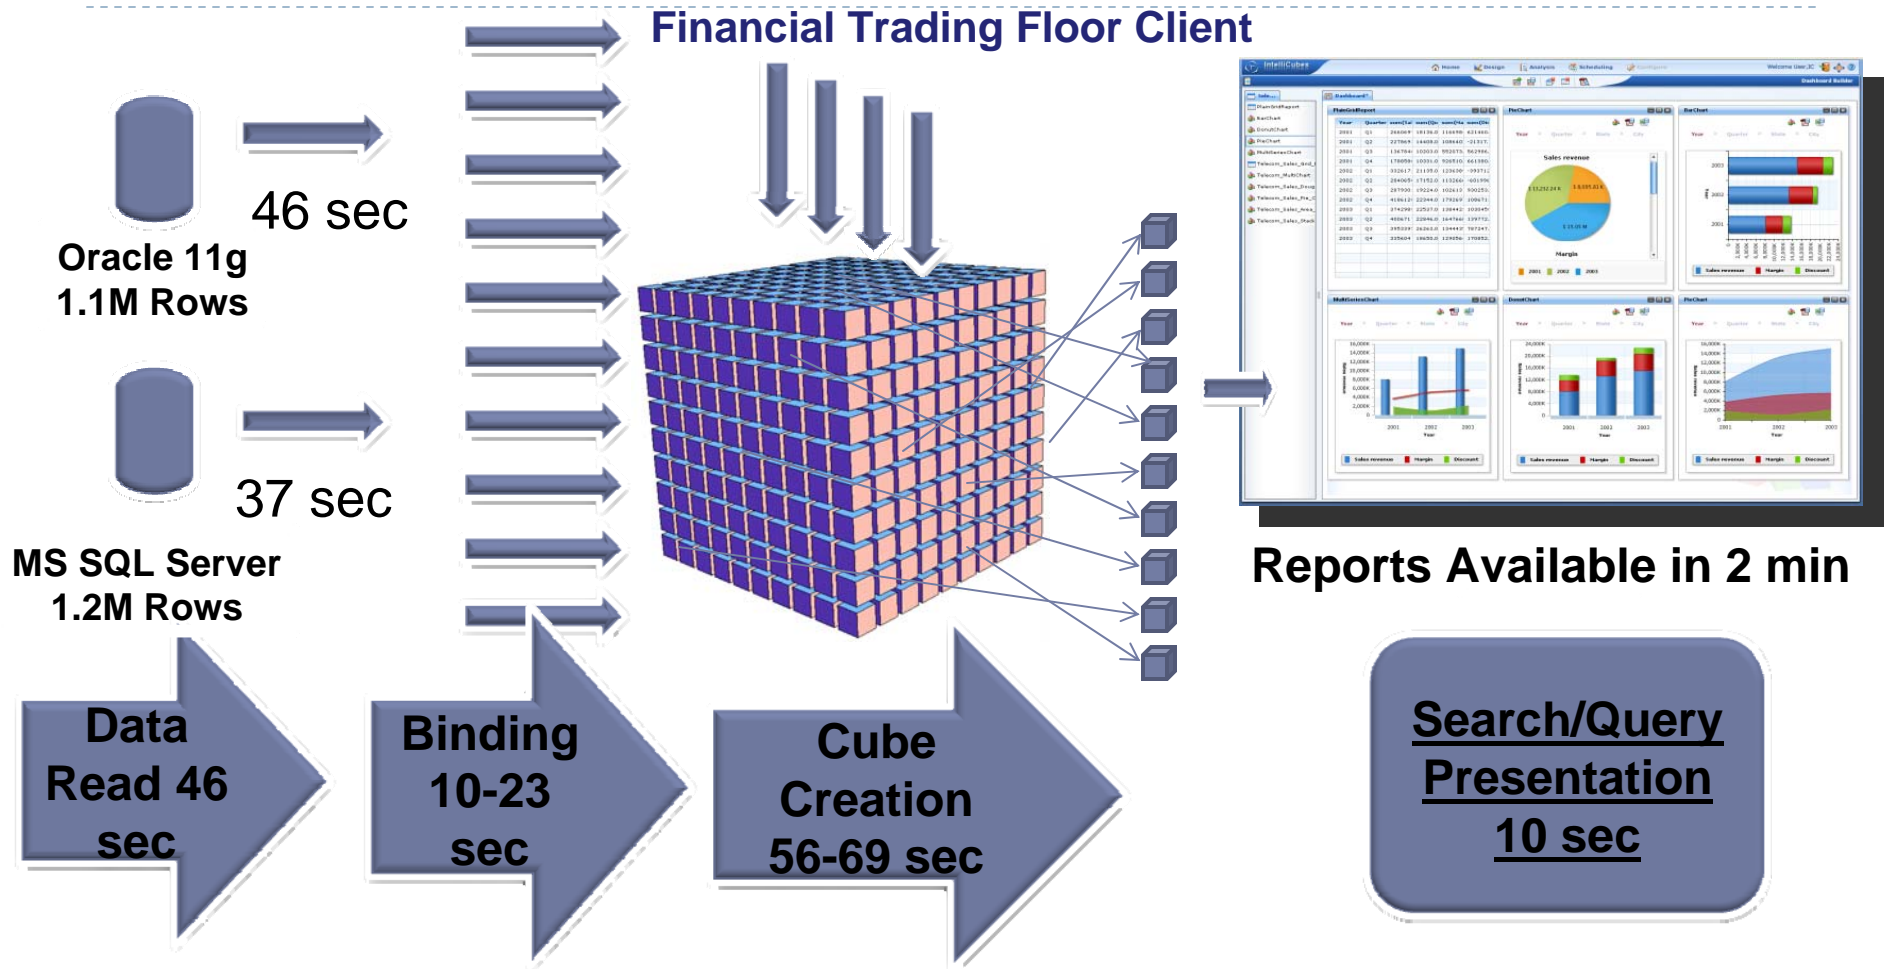

---

Like us, other solutions may merge disparate data, providing reports and dashboards, but only IntelliCubes delivers:

- a comprehensive BI suite at a fraction of the hardware, software, implementation and maintenance costs of comparable BI products **➤ In Real-Time**
- an alternative to walking away from investments made in SAP BW, SAP BO, Cognos or other BI vendors **➤ To Unlimited Users**
- ability to connect to any data source (including other BI vendor data) to accelerate, scale, and deliver timely data throughout the enterprise **➤ In a Virtual Environment**

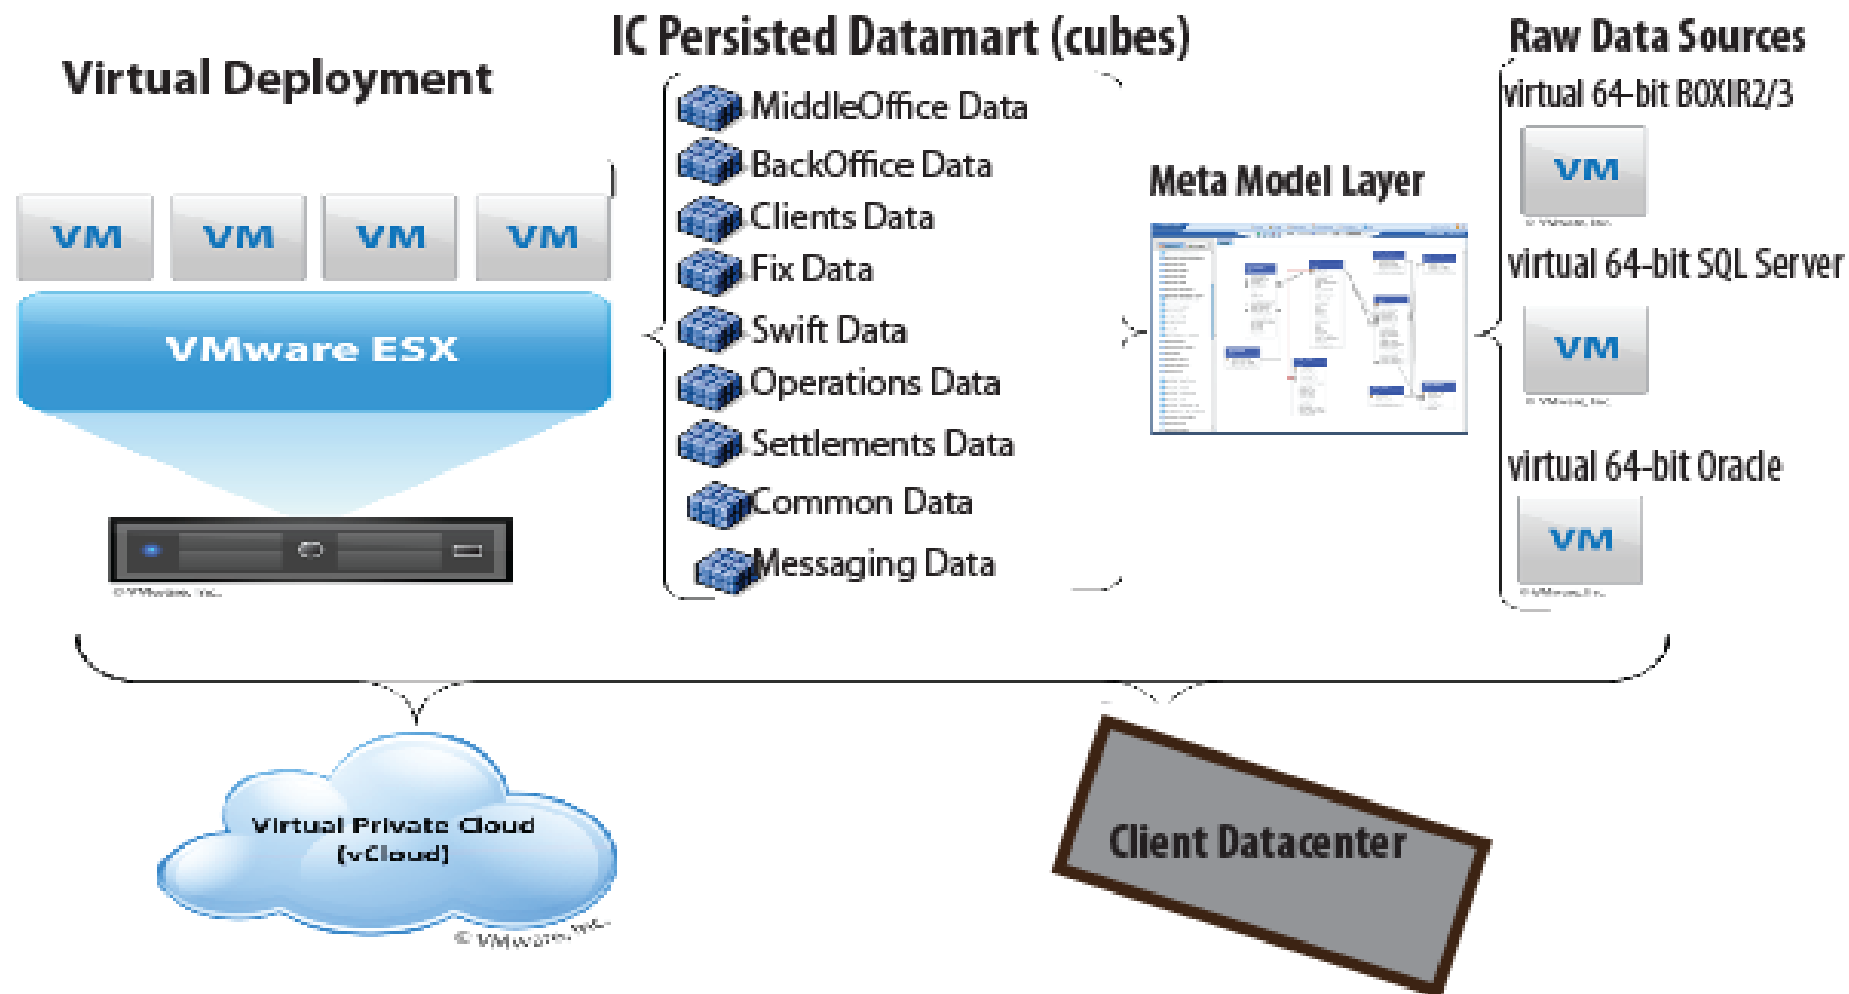

**Translating to Actionable Data available to anyone  
in any environment at a lower TCO.**

# IntelliCubes Running in Parallel with Seconds to Output without Caching Data

No more than 70MBs of memory were consumed at any point in the process!

## Available in Datacenters or in the Cloud

## Industries Served

---

- Financial Services
  - Healthcare
  - Consumer Products
  - Communications and Internet
  - Highly-Regulated or Competitive Industries
- 
- **Companies Served**
    - Enterprise-sized organizations with multiple data sources that may include SAP BW, BO, Cognos, etc.
    - SMBs without a current BI solution
- 
- **How?**
    - Fast, Reliable Performance
    - Breaches User Limits
    - Availability in the Cloud or in the datacenter
    - Significantly reduced TCO—making BI affordable even for SMBs.

**“Web-based delivery could divert share from SAP to SaaS...[having an] adverse effect on us in a variety of ways.”**

SAP Annual Report 2008

**OLAP tools provide “slice and dice” analysis and “(MOLAP) cubes, in-memory data models or BI software-as-a-service (SaaS)” are key for self-service functionality.**

The Forrester Wave™ Q3 2008

**“Scalability remains the largest challenge in the industry. Expect the big guys to talk about how they are going there and to buy there way out of this one.”**
