The Top 10

Acculynk | www.acculynk.com

Acculynk is a leading technology provider with a suite of software-only services that secure online transactions. Backed by a powerful encryption and authentication framework protected by a family of issued and pending patents, our services provide greater security, reliability and convenience for consumers, merchants, networks, issuers and acquirers. Our flagship product, PaySecure™, is the first and only software solution for PIN debit on the Internet. Acculynk is headquartered in Atlanta with a management team that brings extensive experience in the financial, security and payment processing industries.

Asankya | www.asankya.com

The growth of cloud applications and media is currently limited by the quality of experience of transferring data into and out of the cloud. Asankya has developed patent-pending technology that intelligently characterizes the network in order to manage data flows. Asankya's Hypermesh service enables each packet of a data stream to be sent along a different network path, dynamically avoiding bottlenecks and congestion points that currently limit speed and quality, while still maintaining packet order. Asankya's innovative capabilities enhance the performance of cloud-based services for a fast, secure, and globally consistent experience.

CCP North America | www.ccpgames.com

CCP was founded in the summer of 1997 with the goal of becoming a leader in developing virtual worlds. With the launch of EVE Online in May 2003, CCP accomplished that goal and more, winning numerous awards and receiving critical acclaim worldwide. CCP has a consistent history of integrating hardware and developing software that is on the cutting edge of technology. CCP is dedicated to the development of progressive virtual worlds, and is founded on the principle of pushing the envelope and breaking new grounds on all levels. Our flagship product and the shining example of our achievements is the virtual universe of EVE Online (<http://www.eveonline.com>).

NanoLumens, Inc. | www.nanolumens.com

NanoLumens' disruptive technology enables flexible high definition displays of literally any shape and size. Thinner and lighter than today's best LCDs or plasmas, NanoLumens' digital displays can be placed anywhere people live, work or play. The NanoLumens structure (52 patents filed) reduces bulk and weight in the largest display sizes and cuts energy use. Our lower installed cost will revolutionize out-of-home advertising, enliven classrooms and conference rooms, and launch a new field of digital architecture. And, with new high-efficiency OLED materials, the end result will be a truly green display!

PlayON! Sports | www.playonsports.com

PlayON! Sports is a digital media company providing a comprehensive white-label solution for the production, management, distribution, and monetization of professional-quality, "TV-like" live events.

Today's media landscape is transforming rapidly as companies in all sectors fight to evolve, remain relevant and survive. PlayON! Sports works with media companies as well as academic institutions to help them: 1) Produce and distribute exclusive, high quality event content for their local communities at a fraction of cost of the traditional TV model; 2) Generate digital advertising opportunities that are differentiated from their competition.

From nearly 150 applications, these companies have been selected as the Top 10 Innovative Technology Companies in Georgia.

Pramana, Inc | www.pramana.com

Pramana is a company which grew out of the high-tech roots of the Georgia Institute of Technology ("Georgia Tech"). Pramana is currently establishing a transparent security framework that enables online enterprises to effectively and confidently distinguish human communications from software-generated clients — thereby verifying legitimate and desired internet use, while at the same time successfully stifling malicious and fraudulent automated online activity. Pramana's products have been proven by trials at several top-tier and mid-tier web services companies, and have also been covered extensively by "Forbes and other national media."

Purewire, Inc. | www.purewire.com

Purewire™ secures business and social interactions on the Web. Purewire is the only vendor that addresses the complete Web security threat landscape to protect users from malicious people, places and things on the Web™. The Purewire Web Security Service is deployed as a SaaS-based Secure Web Gateway that sits between a company's network and the Internet to protect users from malware, phishing, fraud and other harmful activity online. Purewire inspects outbound traffic for safety and compliance, and analyzes site response traffic for malicious programs and untrustworthy users – regardless of location or device, including laptops and mobile devices.

SecureWorks | www.secureworks.com

With over 2,000 clients, SecureWorks is one of the market's leading Security as a Service providers. Organizations are protected from external and internal cyber-threats through SecureWorks' On-Demand Security Information and Event Management (SIEM) platform, the SecureWorks Counter Threat UnitSM and three fully synchronous Security Operations Centers (SOCs) staffed with SANS GIAC certified analysts working 24x7 to safeguard client systems. SecureWorks has won SC Magazine's "Best Managed Security Service" award for 2006, 2007 & 2008 and has been named to the Inc. 500, Inc. 5000 and Deloitte lists of fastest-growing companies.

Suniva, Inc. | www.suniva.com

Suniva develops, manufactures and markets high-efficiency silicon photovoltaic (PV) cells in the USA for clean, earth-friendly power generation and is dedicated to driving down the cost per watt of solar generated power. We are developing our products focused on the intersection of high efficiency and low cost, as we believe that is the mass market for solar PV. Our current and future generation products are and will be high conversion efficiency cells, but not at the expense of high cost.

Unicoi Systems, Inc. | www.unicoi.com

Unicoi Systems is a leading provider of real-time voice, video and data software and reference designs to embedded device developers and OEMs worldwide. Founded in 2000 in Atlanta, Georgia, over 300 leading companies with millions of design deployments worldwide rely on Unicoi to power their solutions.

Unicoi's Fusion Embedded Software, which boasts the world's most widely deployed networking stack, is empowering the next generation of IP media devices, including: VoIP browser phones, smart appliances, IPv6 compliant military applications, portable gaming consoles, and multiple next generation mobile internet devices (MIDs).
