FOR IMMEDIATE RELEASE**McKesson Technology Solutions President Pamela Pure to Give
Keynote Address at the 2008 TAG Excalibur Awards**

ATLANTA (July 30, 2008) – The Technology Association of Georgia (TAG) proudly announces that Pamela J. Pure, executive vice president, McKesson Corporation and president, McKesson Technology Solutions, will present the keynote address at the fourth annual Excalibur Awards ceremony to be held October 10, 2008, 7:30 a.m. at the InterContinental Hotel in Buckhead.

Pure is responsible for overall leadership of IT and automation initiatives across a broad range of customer and operational activities at McKesson. She brings nearly 25 years of executive and operational experience in healthcare information technology, particularly in the areas of product management, corporate strategy and business operations.

“TAG has been a fixture of the Atlanta technology community for nearly 10 years,” said Pure. “It has helped transform Atlanta and the state of Georgia into one of the country’s growing technology centers. As a TAG member since 2003, McKesson has seen firsthand many of the successes this organization has achieved.”

The Excalibur Awards recognize Georgia’s technology-enabled companies that demonstrate exemplary competency in utilizing technology to enhance their business. To nominate a company for the 2008 Excalibur Awards or to register to attend the event, visit www.tagonline.org/excalibur-awards.php.

“McKesson is one of the largest Fortune 500 companies represented in Georgia and we are privileged to have the head of McKesson Technology Solutions as our 2008 keynoter,” said Tino Mantella, president of TAG. “Pamela’s record of overseeing numerous successful product introductions and acquisitions at McKesson is a testament to her business acumen and leadership qualities. She is an example of an executive who has championed the use of technology to make healthcare better, safer and more connected.”

More than 2 million clinicians in North America rely on McKesson products to deliver healthcare, and its medication safety bar-code scanning solutions are used to prevent more than 700,000 potential errors each week. The company has a technology reach to 20% of all physicians in the United States and all of the top 25 commercial health plans. Its RelayHealth connectivity business processes more than 70% of the nation’s retail pharmacy transactions and more than \$1 trillion in financial transactions each year.
